## Frontend Developer - Java EE & Angular

thyssenkrupp Group Services Gdańsk, Location: Gdańsk, Poland

### Your Responsibilities

- In our Digital Labs we are exploring new technologies and implementing use case driven prototypes. You will take responsibility for the further development of these existing prototypes to production ready software
- You will participate in new and innovative green field projects and can try out new technologies
- You will have the opportunity to explore unfamiliar technologies and tools and expand your skill set, with support from the team to grow and succeed
- After launch, you will continuously work on improving the products and use cases through regular updates and implementing new features based on customer feedback and market needs.
- You will work in an agile team with monthly sprints
- Participation in dailies, sprint reviews and planning meetings
- You will plan and conduct comprehensive testing to ensure the product's functionality, security, and reliability. This includes automating tests and ensuring high test coverage.
- You will create and maintain comprehensive technical documentation and actively share your knowledge within the team to promote sustainable and efficient development.
- Rollout of releases (in cooperation with Service Lifecycle Management)

### Your Profile

- 3+ years of work experience in a related position
- Experience with:
  - Jakarta EE / Microprofile (Payara)
  - Native Android (Kotlin)
  - Docker/K8S/Helm
- English at min. B2 level, German language would be an advantage
- Experience with the following tools is hugely desirable:
  - Jakarta EE / Microprofile (Payara)
  - Angular
  - Native Android (Kotlin)
  - Flutter (Android/iOS/Web)
  - Postgres database
  - Docker/K8S/Helm
  - Linux
  - Jenkins
  - Arc42 as documentation framework

### What we offer you
